When Canon revived its PowerShot S range with the S90 in August 2009, it was in acknowledgement of a clear demand from enthusiast photographers for high quality yet pocketable cameras offering extensive manual control. The S95, which followed almost exactly a year later, stuck with much the same formula - a relatively large sensor (at least in compact camera terms), a 28-105mm equivalent zoom ...

June 2013: The Canon EOS 700D / Rebel T5i replaces the very short-lived Canon EOS 650D / T4i but is almost indistinguishable from it in terms of design, operation and specification. Our tests have found the image quality and performance of both cameras to be identical and they use the same batteries and accessories as well. Accordingly, this review is a very slightly modified version of the ...

the canon camera , and i am more than satisfied with the image QUALITY , both jpeg and raw. The autofocus is instant for both stills and videos with either the vf or the lv. The only thing i don't like is the auto tracking ability of subjects through the vf. The good news is that tracking through the lv is awesome.

Original DIGIC. The original DIGIC was used on the PowerShot G3 (Sep 2002), Canon S1 IS (Mar 2004), A520 (Mar 2005), and other cameras. It consists of three separate chips: a video processing IC, an image processing IC and a camera control IC.. DIGIC II. DIGIC II is a single chip system introduced in 2004, unlike the first DIGIC, that allowed for more compact designs.
