Natural selection is the differential survival and reproduction of individuals due to differences in phenotype.It is a key mechanism of evolution, the change in the heritable traits characteristic of a population over generations. Charles Darwin popularised the term "natural selection", contrasting it with artificial selection, which in his view is intentional, whereas natural selection is not.

Darwin noted that the fossil record seemed to be missing the transitions from one kind of organism to the next that would confirm his gradualistic notion of evolution. Shortly after Darwin, there were proponents of evolutionary saltation—the notion that evolution happens in great leaps. The almost complete absence of transitional forms in the ...

Darwin's work served as a catalyst to popularize evolutionary thinking. [66] A sort of aristocratic turn, the use of the struggle for life as a base of social Darwinism sensu stricto came up after 1900 with Alexander Tille 's 1895 work Entwicklungsethik (Ethics of Evolution), which asked to move from Darwin till Nietzsche .

The protests and riots that erupted across the United States following the death of George Floyd started a new chapter in the long history of racial discrimination and reconciliation. One chapter often goes unnoticed in that history: the racism of Charles Darwin's theory of evolution. Race-based discrimination has multiple sources, many of which preceded Darwin, but

Still, while Darwin certainly didn't invent racism, his ideology of evolution has fostered it. Consider the case of Ota Benga—a pygmy from Central Africa, who in 1906 was caged in the Bronx Zoo with an orangutan. Remember the Jews in the gas chambers devised by Hitler to advance the Aryan "master race."

[Did Darwin Promote Racism? | Answers in Genesis](#)

I have so much respect for Darwin's ideas that when I hear someone twisting them into something else (especially those who equate Darwin to Hitler!), I feel the urge to throw something at them. Furthermore, while it's probably judgmental and unfair, the truth is belief in evolution has become a measure of intelligence and credibility for me.

Use in evolutionary theory. Darwin did not consider the process of evolution as the survival of the fittest: he regarded it as survival of the fitter, because the " struggle for existence" (a term he took from English economist and demographer Thomas Malthus) is relative and thus not absolute.Instead, the winners with respect to species within ecosystems could become losers with a change ...
